What is claimed is:

- 1. A floor display system, comprising:
 - a floor covering;
- an electronic display device associated with the floor covering, wherein the electronic display device is to display electronically modifiable arbitrary content;
 - a controller; and
- a sensing device coupled to the controller, wherein the sensing device is associated with a specific location on the display device and is to generate a signal to the controller to cause a content of a display of the display device to be modified or newly generated at the specific location.
- 2. The floor display system of claim 1, wherein the sensing device is responsive to light.
- 3. The floor display system of claim 2, wherein the sensing device generates the signal based on detecting a change in an amount of light.
- 4. The floor display system of claim 1, wherein the sensing device is responsive to pressure.
- 5. The floor display system of claim 4, wherein the sensing device generates the signal based on detecting a change in pressure.
- 6. The floor display system of claim 1, wherein the sensing device is responsive to temperature.
- 7. The floor display system of claim 6, wherein the sensing device generates the signal based on detecting a change in temperature.

- 8. The floor display system of claim 2, wherein the sensing device includes a photo diode.
- 9. The floor display system of claim 2, wherein the sensing device includes a photo detector.
- 10. The floor display system of claim 2, wherein the sensing device includes a photo transistor.
- 11. The floor display system of claim 1, further comprising a plurality of the sensing devices.
- 12. The floor display system of claim 11, wherein the sensing devices are arranged in an array comprising rows and columns.
- 13. The floor display system of claim 11, wherein the plurality of sensing devices are arranged to form a mixture of comparatively fine resolution and comparatively coarse resolution.
- 14. The floor display system of claim 11, wherein the sensing devices are arranged below a transparent member of the floor display system.
- 15. The floor display system of claim 11, wherein the sensing devices are arranged with a comparatively fine resolution on or near an edge of the floor display system.
- 16. The floor display system of claim 2, wherein the sensing device is arranged within a recess.
- 17. The floor display system of claim 2, wherein the sensing device is a passive device.

- 18. The floor display system of claim 2, wherein the sensing device is an active device.
- 19. The floor display system of claim 1, further comprising an audio device to generate an audio output relating to content displayed on the display device.
- 20. The floor display system of claim 19, wherein the audio device includes a directional speaker.
- 21. The floor display system of claim 1, further comprising a substantially vertical or inclined display device.
- 22. The floor display system of claim 21, wherein the substantially vertical or inclined display device generates a display with alphanumeric data or a graphic image relating to alphanumeric data or a graphic image of a display of the electronic display device associated with the floor covering.
- 23. The floor display system of claim 1, wherein the substantially vertical or inclined display device includes a projection device.
- 24. The floor display system of claim 1, wherein the electronic display device includes a nanocarbon display.
- 25. A floor display system, comprising:
 - a floor covering;
- an electronic display device associated with the floor covering, wherein the electronic display device is to display electronically modifiable arbitrary content;
 - a controller; and
- a plurality of sensing devices coupled to the controller to generate an image on the electronic display device that tracks the movement of an object.

- 26. The floor display system of claim 25, wherein each sensing device is associated with a specific location on the display device and is to generate a respective signal to the controller to cause alphanumeric data or a graphic image of a display of the display device to be modified or newly generated at a respective specific location.
- 27. A floor display system, comprising:
 - a floor covering;

an electronic display device associated with the floor covering, wherein the electronic display device is to display electronically modifiable arbitrary content;

a controller; and

a signaling device coupled to the controller to emit a signal corresponding to a display content of the electronic display device.

- 28. The floor display system of claim 27, wherein the signal comprises a light.
- 29. The floor display system of claim 27, wherein the signal comprises a sound.
- 30. The floor display system of claim 27, wherein the signal comprises an olfactory stimulus.
- 31. The floor display system of claim 27, wherein the signaling device is free-standing.
- 32. The floor display system of claim 27, wherein the signaling device is comprises a fastening device to fasten the signaling device to a support.
- 33. The floor display system of claim 27, wherein the signaling device is coupled by a wired connection to the controller.
- 34. The floor display system of claim 27, wherein the signaling device is coupled by a wireless connection to the controller.

35. The floor display system of claim 27, wherein the floor display system generates the display and the signaling device generates a corresponding signal in response to the detection of a proximity of a person.

36. A method comprising:

- (a) arranging a floor display system in a commercial establishment;
- (b) displaying content on the floor display system, the content relating to a promotion or advertisement of a product in the commercial establishment;
- (c) arranging a signaling device coupled to the floor display system near the product; and
 - (d) causing the signaling device to emit a signal in response to step (b).
- 37. The method of claim 36, wherein the signal comprises a light.
- 38. The method of claim 36, wherein the signal comprises a sound.
- 39. The method of claim 36, wherein the signal comprises an olfactory stimulus.
- 40. The method of claim 36, wherein the floor display system displays the content and the signaling device emits a corresponding signal in response to a detection of a proximity of a person.
- 41. The method of claim 36, wherein the floor display system is arranged in a common area of the commercial establishment.
